and bore the burden of the western soldier. Concurrently with the policy of interior culture and closer settlement in the eastern third of the State will have to go a more intelligent treatment of those who occupy the western divide. While the eastern section has to be made more attractive, the western has to be made more productive. Both require the application of capital and labour. The eastern third requires relatively more people than capital, the western more capital than people. And if these two facts be kept in mind, as well as yet another necessity of the position—that the capital of the people should be employed in the public domain, and land rather than in land grabbing—then the settlement must be more conducive to the steady and rapid progress of the State than has been the case in the past. Had this policy been pursued in the past there would not now require to be that readjustment at such sacrifice to the public good which is found necessary. The bursting-up of big estates, the speculation on the land system of the past, but homes must be found for people who are to occupy the western divide, and that men on both sides of the divide should be enabled to the work of providing for them in a happy way of better land, and the State will be able to secure the thousands of acres. Only intelligence is required to make it available.

THE WILLOUGHBY SEAT.

The vacancy in the Legislative Assembly caused by the resignation of the late member for Willoughby occurs at a time when the Government are occupied with larger interests, and it is therefore a matter of some importance that the seat should be filled. The Government are desirous of securing a member who will be able to represent the interests of the district, and who will be able to assist the Government in their work. The Government are desirous of securing a member who will be able to represent the interests of the district, and who will be able to assist the Government in their work.

CLOSER SETTLEMENT.

The experience of the last decade illustrates the wisdom of the Government in accepting the suggestion of Mr. Ashby to appoint a commission to make inquiry into the lands on the northern rivers. The commission has reported that the lands are suitable for closer settlement, and that the Government should take steps to encourage settlement. The Government are desirous of securing a member who will be able to represent the interests of the district, and who will be able to assist the Government in their work.

THE AMERICA CUP.

THE FIRST RACE.

REMAINED ON SATURDAY.

WON BY RELIANCE.

AN EASY VICTORY.

LONDON, Aug. 23. The first of the series of races for the America Cup between the British schooner Shamrock III, the challenger, and the Irish schooner Reliance, the defender, was sailed today over the Sandy Hook (New York) course, after an inconclusive contest of Thursday, and resulted in an easy win for the Reliance.

Early in the morning there was a 12-knot breeze from the south-west, and it gave every appearance of continuing, but as the time for the race drew near it slackened down to 10 knots.

The course was the same as on Thursday, namely, a best dead to windward for 10 miles, and a run home of the same distance.

Shamrock III. crossed the line with a lead of four seconds from Reliance, but after the yacht had been 2 hours and 10 minutes upon her journey Reliance overhauled her opponent and passed her.

Reliance easily maintained her lead and won 7 minutes and 3 seconds, after deducting the time allowance of 1 minute 57 seconds of Shamrock III.

In the race yesterday both Shamrock III. and Reliance started with baby jib-topsails in addition to ordinary working sails, but soon took in the extra canvas as the wind freshened to between 12 knots and 17 knots.

The Reliance, which had the windward berth early in the race, blanketed Shamrock III., which held her own on the second tack, but on the next tack the Reliance pointing higher into the wind obtained a substantial lead. Reliance made the turn for home with a lead of three minutes.

The crew of Reliance proved the master in setting sails for the run home, while Shamrock III. had trouble with her jib, and wasted several seconds.

On the run home Reliance steadily increased her lead, and it was apparent that Shamrock III. was no match for her in running.

The yacht never travelled so fast that she left many of the exhibition boats and tugs following the race hopelessly behind.

Reliance crossed the winning line amid a perfect fusillade of yells and whistles. Her time was 3 hours 32 minutes. Shamrock III. finished 9 minutes later.

SHAMROCK DECLINING IN FAVOR.

LONDON, Aug. 21. With respect to the series of races for the America Cup the betting is 3 to 1 on Reliance, the defender, but there is nothing offering on Shamrock III., the challenger.

Yachting experts are disappointed with the work done by Shamrock III.
